KIDS' CURE™
OUTREACH PROJECT

THE 44-CENT CURE OUTREACH PROJECT

Kids Involved in the 44-Cent Cure Outreach Project will collect coins to help cure children in other countries from painful intestinal parasites.

Approximately 40% of the world's children are infected by intestinal parasites usually caused

by dirty water and poor sanitation. Parasites affect a child's development and cause hunger, nausea and lack of energy. In about 60,000 severe cases each year, they kill.

The cure costs just 44 cents.
